Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

RCE

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 2, 2002 has been entered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11, 13, 16, 18 and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Latypov (5,846,134) in view of Ahdoot (5,913,727), further in view of Ullman et al (5,488,362).

Regarding claims 1-11, 13, 16, 18 and 29, the examiner incorporates the rejection made in the prior office action, paper #12, as it relates to the elements of the claims taught by Latypov and Ahdoot, herein. With respect to the newly added claim feature of the generation of action information on the basis of a transition of the estimated relative position, Latypov and Ahdoot do not provide an explicit teaching of this feature. However, in an analogous prior art input system that operates in a virtual

gaming environment, Ullman teaches this feature (abstract; Fig. 4; Fig. 5; col. 2, lines 21-25 and lines 41-60). Ullman teaches sensors {contacts and switches} on the user's hands, wrists and fingertips that sense different transitions {angles} in movements depending on how each of these body parts are moved. For example, a certain movement of a player's wrist creates a predetermined angle between his hand with respect to his forearm, therefore a certain input occurs (col. 2, lines 21-32). Column 2, lines 54-67 through col. 3, lines 1-10, teach different inputs depending on the transition {the angle} of the hand to the forearm. It would have been obvious to include this feature, as taught by Ullman, in the virtual input devices of Latypov or Ahdoot in order to make the input more accurate; thereby making the game more realistic.

Examiner's Response

The examiner has addressed the newly amended claim element, which Applicant argues for patentability. Further, Applicant's arguments are moot in light of the new claim rejections including the reference Ullman, which was cited as prior art in paper #3, the first office action.

Pertinent Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Roelofs and Kramer teach gaming in a virtual environment.
